| 英文書法（硬筆） | <p>The Future We Build</p> <p>Today, technology is not just invention, it is imagination made real. Artificial minds learn and grow, quantum machines break barriers unseen, and networks connect voices across oceans.</p> <p>Yet the future is not built by machines alone. It is carried in the courage of students, in the persistence of dreamers, in the wisdom of teachers, and in the hope of communities.</p> <p>Innovation is a torch we pass, from one generation to the next. It asks us not only to create, but to question, to reflect, to care. For progress without compassion is a road that leads nowhere.</p> <p>So let us write with steady hand, not only codes and formulas, but visions of fairness, dreams of equality, and promises of peace.</p> |

| | |
|--|---|
| | <p>Technology is the language of tomorrow, but humanity is its voice. Together they sing a song of resilience, a song of discovery, a song of futures yet to come.</p> <p>And when history looks back, it will not only see the machines we built, but the values we carried, the bridges we raised, and the world we dared to imagine.</p> |

| | <p>有博學而篤志，方能在科技之海中乘風破浪。君子當以勤勉為舟，以智慧為帆，以創新為矛，以堅毅為盾，則可行於萬里之途。</p> <p>觀夫城市之變，昔日漁火點點，今則高樓林立；昔日信鵠傳書，今則網絡相連。科技之力，縮地千里，通達四方。然其本心，非徒為利，乃欲解人之困，助人之行，成大同之世。</p> <p>是故，科技非冷器，乃熱心；非孤技，乃群智。人皆有創新之心，則天下有創新之政。以創新之心，行創新之政，則未來可運於掌上。</p> <p>願吾輩勉之：不畏艱難，不懼風雨，持續探索，勇於突破。使科技之光，照耀人間；使智慧之火，永不熄滅。如此，則「科技創未來」不止口號，而成真理。</p> |
| 英文書法（硬筆） | <p>Summer of Innovation</p> <p>Before the screens have even glowed, The circuits hum, the future showed. Ideas linger, bold and grand, Technology reshapes the land.</p> <p>From steam and fire to silicon light, Human progress climbs new height. The printing press once spread the word, Now satellites make voices heard.</p> <p>Artificial minds that calculate, Predict, create, and innovate. Data flows like rivers wide, Guiding ships on oceans' tide.</p> <p>Summer lingers, but it's about change, About new worlds we can arrange. From AI minds to stars above, The future builds with human love.</p> |

Yet let us pause and think with care,
Of values we must always share.
For science grows, but heart must guide,
Or progress leaves the soul aside.

So write these lines with vision clear,
That future generations hear:
Innovation is a torch we bear,
To light the path, to show we care.

Technology is not the end,
But means to help the world transcend.
With wisdom, courage, hand in hand,
We build tomorrow's promised land.
